

15th MECHATRONIKA 2012

(<http://mechatronika2012.cedupoint.cz>)

Brief Instructions for Authors

- Follow the deadlines for registration and fee payment, as well as for the final paper submission, given on the conference web-site
http://mechatronika2012.cedupoint.cz/?page_id=27
- Download the MS Word full paper template ().
- There is no limitation for length of the paper; however, the recommended number of pages is 6. Leave the header and the footer empty. Do not number the pages.
- Fill in the copyright form (received by e-mail), print it and sign the form. Scan the form. Copyright form must be submitted together and at the same time with the full paper, in either JPG or PDF format.
- Only PDF is accepted for final paper submission. The PDF of the paper HAS TO BE created using IEEE's service PDF eXpress, to ensure its compliance with IEEE requirements for PDF files. To convert the source file into PDF using IEEE PDF eXpress, do the following:
 - Access IEEE PDF eXpress at the following link: <http://www.pdf-express.org>
 - Register as a user for this free service using the link 'New Users – Click Here'. 'Conference ID' has been sent to your e-mail. Use your e-mail address at which you want the PDF delivered (the IEEE PDF eXpress is not a file-collection system!).
 - Follow the instructions on the web-page and submit source file for conversion into PDF. You will receive the PDF by e-mail and you can also download it directly from the web-site upon conversion.
 - Check the PDF and ensure that there are no runaway figures, equations, and similar.
- You have now your paper and the copyright form ready for submission to me2012@cedupoint.cz. Do not forget to include the source file (MS Word preferred) into your e-mail.

- If your final paper is accepted, you (or co-author) are under obligation to present it at the conference.
- Authors might be asked to complete their papers (based on the results of review process).

If you have any more questions, please contact the conference organizers at me2102@cedupoint.cz
